**Welcome to our 36th Annual Spring Bull Roundup!**

We are proud to present this year's offering of Hereford cattle and Quarter Horses that bear our brands as a trademark of performance, quality and proven genetics.

What an unprecedented year in the cattle business! It has been good to see rancher neighbors and friends have the opportunity to invest in capital improvements for the next generation, pay down debt and invest in superior genetics!

Our customers have earned the rewards of crossbreeding by maximizing heterosis in their commercial cowherds. They have realized the economic benefits of introducing Hereford bulls into their Black cowherds. Cattle buyers look to invest in healthy cattle that grow, convert efficiently and grade ...and, producers that breed those kind will be rewarded. Our 2015 bull offering ranks in the breed's top 20 percent for Yearling Growth and Marbling both, and is backed by the high maternal, cowherd warranty that's bred-in to H5 bulls and females.

For several years, we've retained feedlot ownership of the entire HR commercial cowherd calf crop through Country Natural Beef, a natural branded beef program. Through CNB data, we have made significant progress in our feedlot performance and carcass quality. Our customers have interpreted their data to increase carcass premiums in several branded programs without sacrificing cowherd traits. A summary of CNB "Net dollars Returned to Ranch" is presented on page 2. In 2013-2104, HHR bull customers' cattle were 5 of the 6 top ranches for "Net \$\$/Hd." including the #1 herd. A 4-year summary of 289 ranches feeding 164,894 cattle showed a \$226 "Net Profit/Hd." for Harrell influence genetics over the average. That's bottom-line profit for HHR genetics!

Today, within a very competitive, fast-paced beef industry, we use every tool available to make the most rapid genetic improvement in our program. Genomic Enhanced EPDs are the next phase in breeding strategies that contribute to more accurate decisions and rapid advancement. All H5 herd sires, maternal sires and many sale bulls (GE-EPD logo) have been GE-EPD tested as we continue to commit to providing the most accurate, superior genetics possible.

Please join the Harrell, Mackenzie and Thomas families for our big, three-day Western Ranchers' Event that starts with the Harrell-Mackenzie Performance Horse preview, continues with our Hereford & Quarter Horse sale and ends with the Thomas Angus Ranch Spring Sale.

We extend a special invitation for "The Cowboy Gathering" on Monday evening after our sale. Join us at the Geiser Grand Hotel for an evening of country music and western fellowship with fellow cattlemen and industry leaders hosted by Harrell Herefords, Thomas Angus and Zoetis Animal Health. Plan on three big days of good cattle, good horses and western hospitality. Please call with questions and we'll look to see you on sale day!

# HARRELL HEREFORD RANCH ...DRIVEN BY DOLLARS AND CENTS OF THE BEEF INDUSTRY!

Since 1971, Harrell Hereford Ranch has committed to producing performance seedstock for commercial ranchers. Their "total program" continues based upon economically driven, dollar-versus-cost, breeding decisions.

Real profit starts at the ranch with cowherd function, efficiency and longevity, continues with total feedlot gain and ends with carcass value versus discounts. That's cows bred, live calves, a problem-free, low maintenance cowherd, good doing cattle, improving carcass yield and quality grade without sacrificing cowherd traits, and NO Yield Grade 4's.

Harrell's continually evaluate their seedstock program utilizing every technology tool available ...American Hereford TPR in-herd records, EPDs, GE-EPDs and carcass ultrasound. They go a larger step forward evaluating H5 genetics in the real world of their own commercial cowherd, in bull customers' cowherds and feedlot & carcass programs using cowherd spreadsheets, feedlot closeouts and carcass grid data. Their total effort is objective, stock are compared and decisions made without the bias of pedigree, showing-type nor herd bull dollars invested.

Stated Bob Harrell, "Our seedstock genetic decisions are based upon a commercial cowman's breeding philosophy. It's "dollars and cents" beef industry driven. Who produces? ...who achieves the premiums? ...and how much does it cost?"

Holden-bred 2012Z's red-meated phenotype, balanced EPDs and bred-in maternal power met our H5 program "herd bull criteria." His moderate BW 79, growth record, WW 814/YW 1385, and carcass ratios, REA 111/MARB 114, are backed by an extended lineage listing 10 Dam of Distinction cows. His standout dam 0663, 3 clvs./WR 103, is now a Holden ET Donor. 2012Z's first calf crop proved him a sire of red meated performance bulls that balance BW, growth and carcass. Daughters will be top cows for production and udder quality. Owner: Harrell.
