his support!"

(L to R):
Bob, Becky & Lexie Harrell, Edna Harrell, Wannie & Beth Mackenzie, Duncan & Maggie

Welcome to our 37th Annual Spring Bull Roundup!

It is our sincere pleasure to welcome friends, family and beef producers to our 37th Annual Spring Bull Roundup. For the past several years, we have had a great ride in the beef business! It's been exciting, rewarding and long over-due. Our friends and customers have been rewarded for their investment in superior genetics and these investments will continue to pay dividends in the years ahead. As the cattle inventory supply starts to catch up with demand, we begin to ask ourselves what can we do to be more efficient while continuing to operate in the lifestyle we've enjoyed the last couple of years. Now is when the investment in superior genetics really pays! Rest assured, the crew at Harrell Hereford Ranch has paid close attention to every detail and are committed to producing cattle that are profitable and efficient for our customers.

We believe strongly in a balanced trait system. While striving for optimum performance, we must always keep the perfect balance of calving ease, cowherd efficiency and carcass value. And, we can never forget the hard to measure traits...fertility, calf vigor, health, mothering ability, longevity, disposition, udders, feet and legs, survivability, and do-ability. In the past we have learned to measure and quantify these traits. Lessons have taught us to avoid the extremes and to stay in the middle of the road which has led to our "balanced approach" for producing rancher herd bulls. I can't say enough about the knowledge learned from retaining ownership of our commercial calves and marketing through the CNB Program. Being a CNB member with access to that much data is just incredible! We have interpreted the data and have shown where Harrell genetics have again risen to the top.

Today, we use every tool available to make genetic improvements faster for ourselves and our customers within a very competitive, fast-paced industry. For the past 15 years, every H5 bred bull and heifer has been carcass ultrasounded. Now, the next phase in breed improvement strategies are Genomic-Enhanced EPDs. GE-EPDs allow breeders and ranchers to make even more accurate decisions and more rapid genetic improvement. Currently, all HHR current sires, maternal grandsires, donors, and all herd bull mothers have been GE-EPD tested along with a majority of this 2016 sale offering identified with the GE-EPD logo ...another example of our dedication and continuing quest to provide the most accurate and reliable genetics for our valued customers. **Please view our website for the most current EPD's, ultrasound, performance sheets and sale videos.**

Please join the Harrell, Thomas and Mackenzie families for our big, three-day Western Ranchers Event Sunday, Monday & Tuesday, March 6-7-8. It begins with our Harrell-Mackenzie Quarter Horse Preview at Mackenzie Ranch headquarters, features our Harrell Hereford Ranch 37th Annual Spring Bull Roundup and concludes with the Thomas Angus Ranch Annual Spring Bull Sale.

We extend a special invitation for "The Cowboy Gathering" at the Geiser Grand Hotel Monday evening following our sale. Join us for an evening of western fellowship and live music with fellow cattlemen and industry leaders hosted by Harrell Hereford Ranch, Thomas Angus Ranch, and Zoetis Animal Health.

It is a privilege to be in an association with such great people. Please don't hesitate to call with any questions. Plan on three big days of good cattle, good horses and good western hospitality ...and we'll look forward to seeing you on sale day!

The Harrell Hereford Ranch seedstock "total program" is based upon economically driven, dollar-versus-cost, breeding decisions. Real profit starts at the ranch with cowherd function, efficiency and longevity, continues with total feedlot gain and ends with carcass value versus discounts. That's cows bred, live calves, a problem-free, low maintenance cowherd, good doing cattle, improving carcass yield and quality without sacrificing cowherd traits, and NO Yield Grade 4's.

Harrells use every tool available ...American Hereford TPR in-herd records, EPDs, 50K GE-EPDs and carcass ultrasound. They go a larger step forward evaluating H5 genetics in the real world of their own commercial cowherd, in bull customers' cowherds and feedlot and carcass programs using cowherd spreadsheets, feedlot closeouts and carcass grid data. Their total effort is objective, stock are compared and decisions made without the bias.

"Our seedstock genetic decisions are based upon a commercial cowman's breeding philosophy. It's "dollars and cents" driven ...who produces? ...who achieves premiums? ...and how much does it cost?" — Bob Harrell
